Bob Ross Oil Colours Landscapes

The artist BOB ROSS has developed a unique system which enables artists at any level (even beginners) to create a realistic landscape oil painting within a few hours. This is made possible through special mediums which Bob has developed together with different manufacturers of artist's materials. He used firm oil paints in exactly coordinated colour shades, a special slow drying primer, special brushes and painting knives, as well as an extensive collection of instruction books and DVD's.

Bob Ross' Soft Oil Colours Flowers

Annette Kowalski, pupil and intimate friend of Bob Ross, who wrote all the „Joy of Painting“ books, has extended the BOB ROSS „wet-on-wet“ painting technique to the floral painting. Even here the beginner soon achieves realistic results. The painting materials for the Floral Painting Technique consist of specially developed „soft“ oil colours in a balanced colour spectrum, 2 mediums and special brushes, as well as two instruction books and a DVD.
